Dear Collegues and Friends,
It is a great honour to invite you to the **Microsurgery Course on Vascular Anastomoses.**

We are proud to announce a cycle of microsurgical practical courses, for neurosurgeons, vascular surgeons, plastic surgeons, maxillofacial surgeons and residents, that will be held in our labs under the direction of Mrs Rosmarie Frick, the worldwide known teacher of the legendary “Zurich Microsurgery Course”.

The number of participants will be expressly limited, in order to allow each trainee to have its own lab station equipped with microsurgical instruments and microscope. During four full days of training, the participants will be able to familiarize themselves with the microinstruments and learn the key-points of micro-dissection, micro-suturing and vascular anastomosis.

With different exercises, on plastic tubes and in vivo, the participants will be able to do their first vascular anastomosis, taking the first step towards the fascinating world of vascular neurosurgery.

We are looking forward to welcoming you in Pavia for our course.

The Scientific Committee

In 2016 Frau Frick’s Microsurgery course will be held in Pavia instead of in Monza.
Pavia is a small city in Lombardy at about 45 km far from Milan.
In Pavia there is one of the oldest Medical Faculty in Italy with Padova and Bologna.
Pavia can be reached by train from Milan-Central Station in about 30 minutes.
By car, the way from Milan to Pavia takes at least 50 minutes by the A7 highway.
International airport of Milan-Malpensa and Milan-Linate are connected by bus to Milan-Central Station.
The above mentioned hotel allows to reach course venue building by foot.
